- 8.5 x 8.5
- 5 x 5

RECTANGLE SERIES

- 10 x 15
- 8 x 12
- 6 x 9
- 4 x 6

GENERAL GUIDELINES

Whenever we speak of “pages” we mean “sides”. So, an 80-page book has 80 sides, and you would upload 80 jpgs, plus 1 jpg for the cover.

Adobe Photoshop Users:

- Files must be saved as JPEGs at 300 dpi in CMYK colorspace. Check your Color Preferences and make sure your CMYK colorspace is set to US Web Coated (SWOP) v2. This is generally the Photoshop default.

- JPEGs should be saved at Quality 12 Maximum with Format Options set to Baseline (“Standard”). Progressive JPEGs will not be printed.

- Each page must be saved as a separate JPEG. The cover file is also a separate JPEG.
***It is a common mistake to think the book consists of all spreads and that the first page you open to is a spread. This is not the case.

Page 1 is a SINGLE right-hand page, and the last page of the book is a SINGLE left-hand page. The first spread in the book is pages 2-3. If you want your book to open to a spread, upload a BLANK white jpg of the same pixel dimensions as the rest of the pages with nothing on it (no text or anything) in the slot for Page 1, and we will discard at the bindery.

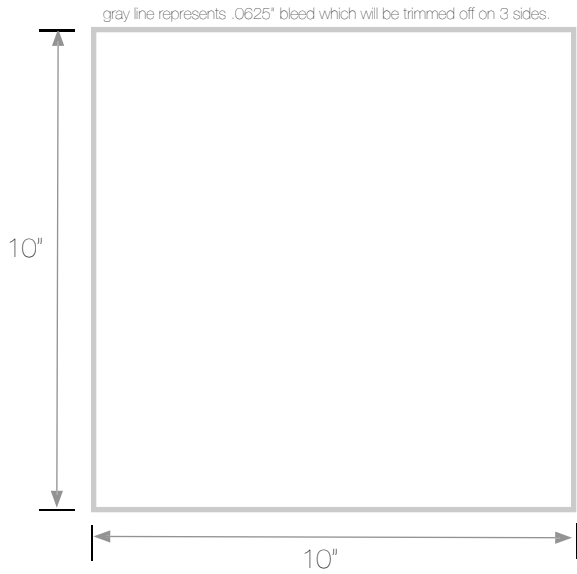

- Keep the spine area clear of text. We center the front image, and wrap the cover around the rest of the book. (The right side is the front cover). The spine width given will fit an 80 page book. If your book has fewer pages, the spine will be skinnier, and the images on the back cover will shift to the right accordingly. That is why we require the spine area clear, because we cannot guarantee centering of the text on the spine.

Please contact support@cornerstonealbums.net if you have any additional questions.

CORNERSTONE ALBUMS

10 x 10 Book Specs

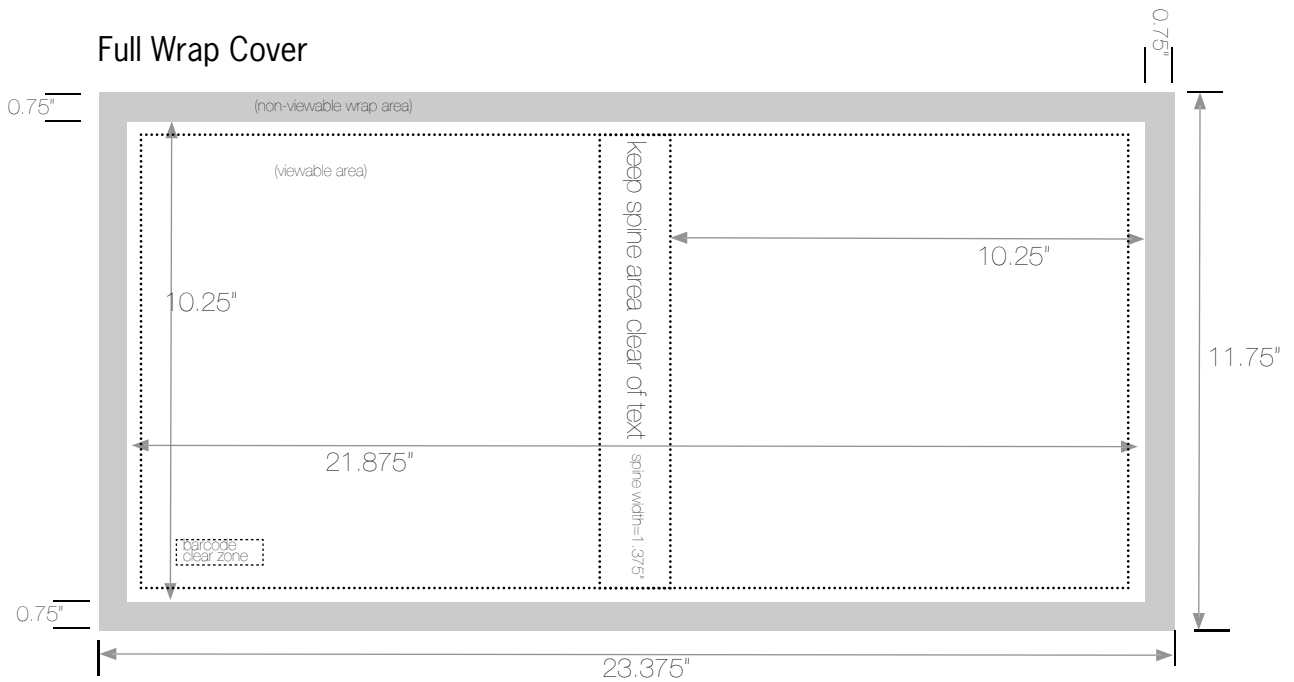

Inside Pages

- 10 x 10 Inside Page
- Page Size: 10" x 10"
